

Tubecon

Tubecon Africa's mission is to become the best supplier our customers have. This would imply that we advise on, supply and deliver products perfectly cut out for your application, on time and with no hassle. With over 30 years of experience in the steel tube manufacturing industry it is worth giving us a call.

MATERIALS:

Materials used to roll profiles and tubes include:

- Z275 and Z450 (Pre-galvanised Material)
- SAE4118, SAE1010
- S355
- Domex 700
- Other materials available on request

PRODUCTS:

Tubecon can assist you by cutting material to size, with a tolerance of +/- 0.1 – saving you time and money. Some of our key products are listed below:

Tubes

Can be cut and rolled to size.

- Big Bore Hollow Sections
 - Larger diameter than average tube in the market
 - Round, square and rectangular available
- Hot Rolled
 - Round, square and rectangular tube
- Cold Rolled
